Medical Gas Outlets, Pendants and Headboards

Medical Gas Outlets

Medical Gas Outlets allows the fast and safe connection of Hospital's Equipment to gas network. The medical gas outlet's type is decided based on national standards or specific requests from the hospital

.

The wall boxes are compatible with AFNOR, DIN, BSI, DISS, CZ standards. All the outlets have dual valve, with a quick connection and disconnection and their components are bronze.

Available in wall, overhang or in rail version.

Medical Headboards CGM / CGM2

Bedside patient units they are used to provide electrical and telephone sockets, gas sockets, internet, lighting, devices with remote control and an organization space for medical accessories.
This equipment combines aesthetic, decorative and functional components.

Medical Gas Pendants

To meet safety requirements, the gas supply to operating rooms, etc., must be fitted with a device to allow instant shut off.

To allow maintenance, the gas supply must be controlled by section. To achieve the demands of safety and maintenance, shut-off valves should be fitted in every main line, riser, and branch line in the pipe work system.
