Variable-Area Flowmeters

Rail Twin High-Flow, 0-15 + 0-30 l/min

OXYGEN THERAPY & ASPIRATION

Variable-Area Flowmeters

Rail Twin High-Flow, 0-15 + 0-30 l/min

Double variable area flowmeter, available in two versions: composed of a 0-15 l/min flowmeter + a 0-30 l/min flowmeter, or with two 0-30 l/min flowmeters; it can be connected to the plant by means of AFNOR NF S 90-116, DIN 13260-1, UNI 9507, BS 5682, G 1/4" M RH threading.

Features

- Rail 90° + 1.5 m hose
- 0-15 + 0-30 or 0-30 + 0-30 l/min

Standards

- NF S 90-116
- UNI 9507
- EN ISO 15002
- DIN 13260-2
- BS 5682
- EN ISO 15001

Components

- Internal body in chemically nickel-plated aluminium
- External body made of MAKROLON
- AISI 316 stainless steel float
- 1 × inlet with standard probe or G 1/4" M RH thread
- 1 × G 1/4" M RH or M12x1.25 M RH and 9/16" threaded outlet
- Brass adjuster knob with NYLON 6.6 terminal unit
- EPDM or silicone O-Ring
- Internal graduated rotameter column and external MAKROLON 2458 polycarbonate column
- 1/4" PVC bar support F
- Medical rubber hose 6x10
