Ambulance Gas Distribution

Free-Standing System - DIN / BS

Oxygen distribution system for emergency vehicles with free installation; the system consists of 2 cylinder reducers, a manual or automatic heat exchanger, terminal units model DIN and BS complete with flanged base for easy installation on panel.

Features

- Two cylinder reducers
- Manual or automatic exchanger
- DIN 13260 or BS 5682 terminal units
- Flanged bases for panel installation
- Predisposition for third source

Standards

- UNI EN ISO 10524-1
- UNI EN ISO 7396-1
- UNI EN ISO 9170-1
- UNI EN ISO 5359
- DIN 13260-2
- BS 5682
- UNI EN ISO 15001

Components

- 1 × pressure gauge scale 0-16 bar, class 2.5
- 1 × manual or automatic heat exchanger (I - II source)
- 1 × emergency supply connection with directional valve and shut-off
- DIN or BS model terminal units
- Low-pressure flexible connections in accordance with UNI EN ISO 5359 complete with swivel fittings

WITH OR WITHOUT REDUCER	INVERSION	N° TERMINAL UNIT AND TYPE	OPERATION PRESSURE
Without reducer	Manual	3 BS 5682	4-5 bar
Without reducer	Automatic	3 BS 5682	4-5 bar
Without reducer	Manual	3 DIN 13260	4-5 bar
Without reducer	Automatic	3 DIN 13260	4-5 bar
